

- 1. Turn the meter on and press Start which begins the 35 second timer. Dip the test strip for 5 seconds without motion into pool water sample. (Sample should be collected from a depth of 18 inches.)
- 2. Remove test strip and dry excess water from test strip with paper towel. Position strip into Auto Feed Strip Track and Pool Check®i will automatically withdraw track and begin scan when timer reaches zero.
- 3. Read your results on the Display Screen.
