

KA-2504 Four Cartridge Kit

Four Cartridge Kit Description:

This kit contains everything required to replace membrane cartridges on any combination of 25 mm or 19 mm OxyProbes®. Everything is conveniently packed in one box for easy storage.

Four Cartridge Kit Includes:

- One 25 ml bottle of DO electrolyte solution
- Four membrane cartridges
- Four sets of internal o-rings

DO Electrolyte Solution: In critical biotech applications, the electrolyte should be changed after every run to yield the best results. The shelf life of this solution is approximately 2 years. Lot numbers and expiration dates are clearly marked on each bottle for tracking.

Internal O-ring Kit: Replacement of the o-rings is recommended whenever the DO sensor is rebuilt. This kit includes the four internal o-rings for an OxyProbe® sensor.
