Quality Control Certificate of Analysis

Product: Hydrogen Sulfide

Lot Number: 031718

To: Sechang Instruments co., ltd.

This document confirms the product described above was tested and meets quality control guidelines at each color test level.

Product testing was performed at two different phases of production: (1) During paper impregnation and (2) after final product assembly. Testing was performed with approved standards. All results met specifications by being within one color block of the standard level or within the ITS, Inc. Microphotometer's appropriate specifications.

Therefore, this product is approved for use by the Quality Control Department.
