

colitagTM

The revolutionary 16–48 hour water test

Colitag™ 16–48 hour testing window

Colitag™ is a presence-absence (P/A) and Most Probable Number (MPN) enzyme substrate test that features a 16–48 hour read window for total coliform and *E. coli* determination. The test detects 1 MPN of total coliform or *E. coli* in a 100 mL water sample. Colitag is relied upon by people around the world.

Run it when you're ready, read it when you're ready

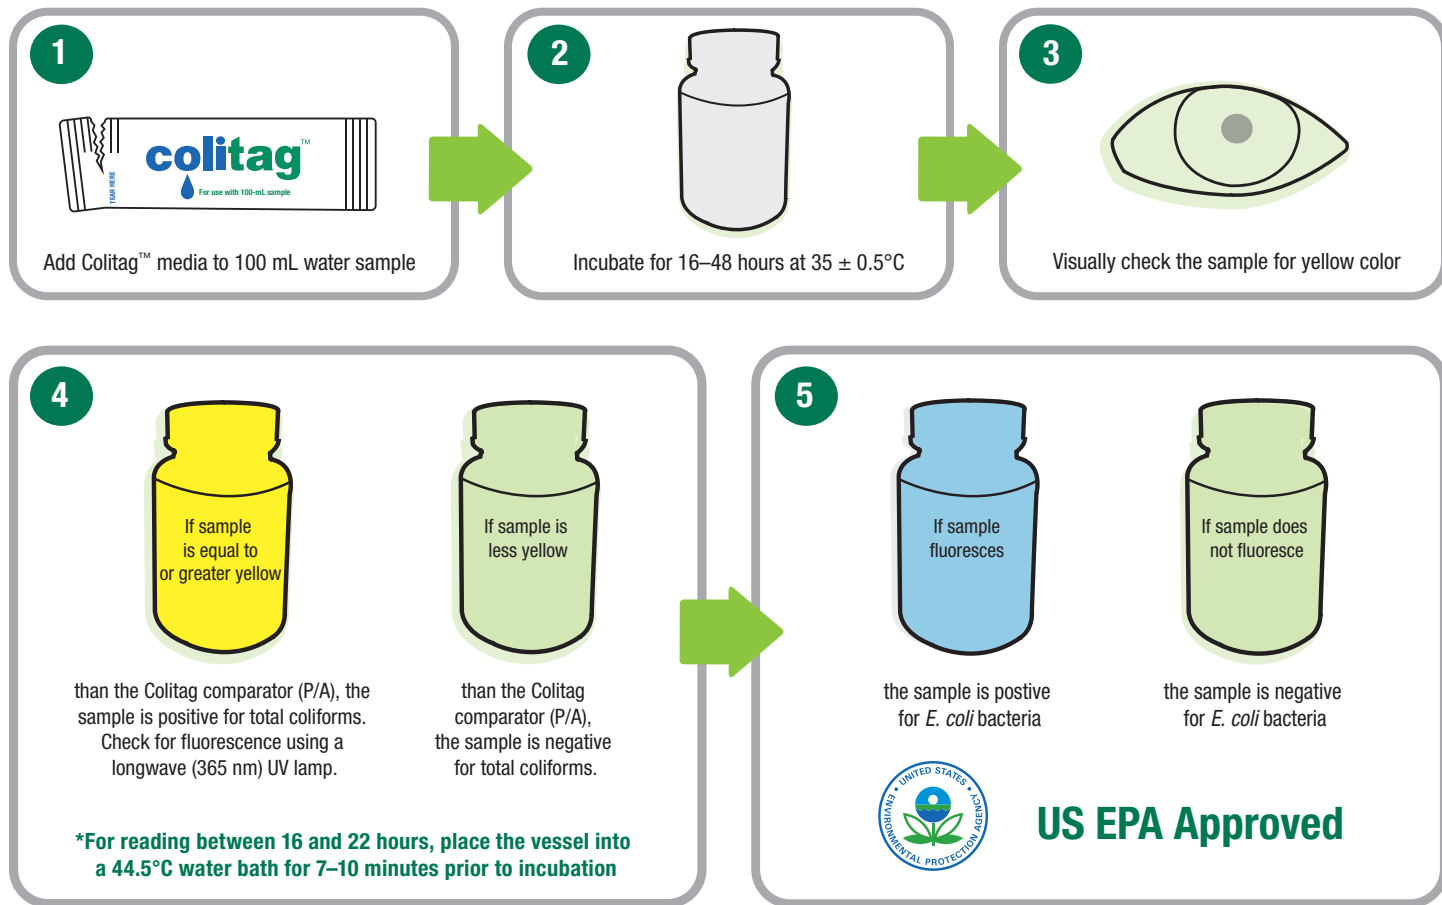

Colitag offers unrivaled flexibility, allowing users one test instead of three to read samples at any time within the 16–48* hour window. Increase lab efficiency and get the job done at your own pace.

Improve your laboratory efficiency

Colitag's bright blue fluorescence, indicating a positive *E. coli* sample, eliminates the need for time-consuming confirmations sometimes required by other enzyme substrate media with lower intensity fluorescence. This, teamed with the flexible reading window, allows a streamlined lab process.

** For reading between 16 and 22 hours, place the vessel into a 44.5°C water bath for 7–10 minutes prior to incubation*

How does Colitag work?

Most Probable Number Enumeration

The Colitag MPNPlate is for the enumeration of coliforms and *E. coli* via the most probable number method.

Easy interpretation of results

1. Visually check each sample for vibrant yellow color. If the test sample is yellow, coliform bacteria are present.
2. If the solution is yellow, examine for fluorescence using a long wavelength UV lamp. If a bright blue fluorescence is observed, the sample is positive for *E. coli*.

Product specifications

Sensitivity:	1 CFU in a 100 mL sample
Testing Time:	16–48 hours
Storage:	2–30°C
Kit sizes:	20, 100 or 200 tests
Approvals:	EPA (Federal register, Volume 74, No. 216/Tuesday, November 10, 2009/Rules and Regulations)

Ordering Information

Item # Product Description:

9850	Colitag P/A water test kits, 20 pack
9851	Colitag P/A water test kits, 100 pack
9849	Colitag P/A water test kits, 200 pack
9855	Sample containers with sodium thiosulfate, 100 pack <i>Sterile flip-top cap and lock polypropylene containers with labels</i>
9859	Sample containers with sodium thiosulfate, 100 pack <i>Sterile screw-top cap and lock polypropylene containers with labels</i>
9857	Colitag comparator, 100 mL
9858B	Colitag MPNplate
