

## Calibration Compatibility and Temperature Information

ANALYSIS NUMBER .....

5217

### Compatibility Information

Traceable® Conductivity Calibration Standards are traceable to standards provided by National Institute of Standards and Technology (NIST). Traceable® Conductivity Calibration Standards are 100% compatible with all makes of conductivity equipment and are 100% compatible with all conductivity accreditation analysis requirements. This Traceable® Conductivity Calibration Standard complies with the requirements of ISO 9000 Certification. It meets accreditation requirements for U.S. Government CAP, ASTM, NCCLS, ACS, and APHA. It may be used to calibrate instruments and to determine a conductivity cell constant.

### Temperature Correction Chart in micromhos/cm<sup>3</sup>

	0.0°C	0.1°C	0.2°C	0.3°C	0.4°C	0.5°C	0.6°C	0.7°C	0.8°C	0.9°C
15°C	1147	1150	1152	1155	1158	1160	1163	1166	1168	1171
16°C	1174	1176	1179	1182	1184	1187	1190	1192	1195	1198

### Temperature Correction Information

If your conductivity meter allows you to set a temperature coefficient (temperature correction) then the underlined number shown above is the best approximation for this specific Analysis Number for this specific Traceable® Calibration Standard. For more precise measurements use the chart. Use the above chart only if you are making absolute measurements. That is, measurements without any automatic temperature correction (temperature coefficient set to 0). Using a thermometer, measure the temperature of this standard. Shown on the chart is temperature (in the far left column) in whole degrees. Shown across the top row is temperature in tenths of a degree. Locate the measured temperature in whole numbers on the far left column, then follow across the row to the temperature in tenths of a degree. At the intersection is the value at that specific temperature. Standardize your meter using that value. Example: Measured temperature is 25.0°C. Find 25°C in the far left column, find the row 0.0°C. Where 25°C and 0.0°C intersect, read the value in micromhos/cm<sup>3</sup>.
